## 141 COMMERCIAL PILOT CERTIFICATE

A commercial pilot certificate allows you to fly an airplane and carry passengers and baggage for compensation or hire. A commercial pilot certificate is the doorway to aviation related flying careers such as flight instruction, charter pilots, airline transport and more.

### HOW TO GET STARTED:

1. Talk to a CFII (Certificated Flight Instructor).
2. Enroll in Online Ground School through Northern Air
3. Possess a Private Pilot Certificate and Instrument Rating (Instrument Rating is not required, but greatly increases the privileges of a commercial pilot)
4. Plan a schedule of flight instruction.
5. Prepare a tentative time and expenditure plan.

### COST ESTIMATE:

Cessna 172 Airplane Rental (hours)	81	\$	125	\$	10,125
Comanche Rental (Complex Aircraft) (hours)	15	\$	225	\$	3,375
Redbird FMX Simulator (AATD)	24	\$	75	\$	1,800
Flight Instruction (hours)	55	\$	47	\$	2,585
Ground Instruction (hours)	35	\$	47	\$	1,645
Books, Computer, Plotter, Study guide etc.				\$	180
Video and Computer Use				\$	50
Taxes				\$	931.80
<b>Subtotal</b>				\$	20,692
FAA Medical Class 2 Certificate				\$	120
FAA Knowledge Test				\$	165
FAA Practical Test with Examiner				\$	500
<b>Subtotal</b>				\$	785
<b>TOTAL COST</b>				\$	<b>21,477</b>

- Northern Air is a FAA approved Part 141 Flight School. FAA Part 141 Commercial Course consists of a minimum of 120 hours. The total time and cost depend on previous experience, the student's learning ability and their frequency of flight.
- A maximum of 24 hours of flight training can be done in our Redbird FMX Advanced Aviation Training Device (AATD) to reduce the costs.
- This estimate assumes the student already has a Private Pilot certificate with an Instrument rating.
- For Commercial Pilot training we use Cessna 172s for basic training and a Piper Comanche (PA24-250) for the complex aircraft portion of the training. Plan for at least 2 hours of additional flight time for the practical test.
- Northern Air Offers:
  - Private Pilot Certificate
  - Instrument Rating
  - Commercial Pilot Certificate
  - Commercial Flight Instructor Certification (CFI and CFII)
  - Tailwheel Endorsements
  - Twin Engine Certificates
  - Complex and High-performance Aircraft Training
- Northern Air has a variety of Aircraft for rental and training:
  - (2) Cessna 172s
  - Cessna 182
  - Piper Comanche PA24-250
  - Champion Citabria (Tailwheel/Aerobatic Aircraft)
  - Redbird TD2 Flight Simulator (Basic Aviation Training Device – BATD)
  - Redbird FMX Full Motion Simulator (Advanced Aviation Training Device – AATD)
