Flight Instruction	55	\$ 57.00	\$ 3,135.00
Ground Instruction	35	\$ 57.00	\$ 1,995.00
Books, Supplies, Video Rental		Varies	\$ 300.00
FAA Medical Class 2			\$ 120.00
FAA Written Knowledge Test			\$ 165.00
FAA Practical Test with Examiner			\$ 500.00
Taxes			\$ 1,143.00
<b>Total Estimated Cost</b>			<b>\$ 26,108.00</b>

- Please Note: Factors for the total time and cost of the Commercial Pilot Certificate depend on previous experience, the student's ability to study, and their frequency of flight. This estimate assumes the student already has a PPL with an Instrument Rating.
- Northern Air is a Part 61 Flight School, meaning the minimum requirement for flight time is 250 hours.
- Students may use the Redbird FMX full motion flight simulator for a maximum of 50 hours of flight training toward the commercial rating, and for as much time as they need afterward to gain valuable experience at half the cost of renting the airplane. Simulators are especially useful for practice with emergencies and during bad weather.
- Plan for at least 2 additional hours of flight time for the practical exam.
